

UTP-1500

AVE

AMERICAN VIDEO EQUIPMENT

AVE-UTP-1500

The AVE-UTP-1500 Video Adapter:

- Is a passive device which allows for the transmission of Video, audio and Pan & Tilt & Zoom or other modulated embedded bi-directional control signals over Unshielded Twisted Pair (UTP).
- This simple device needs no tools to install, just push and hold the locking buttons, insert the wire and release.

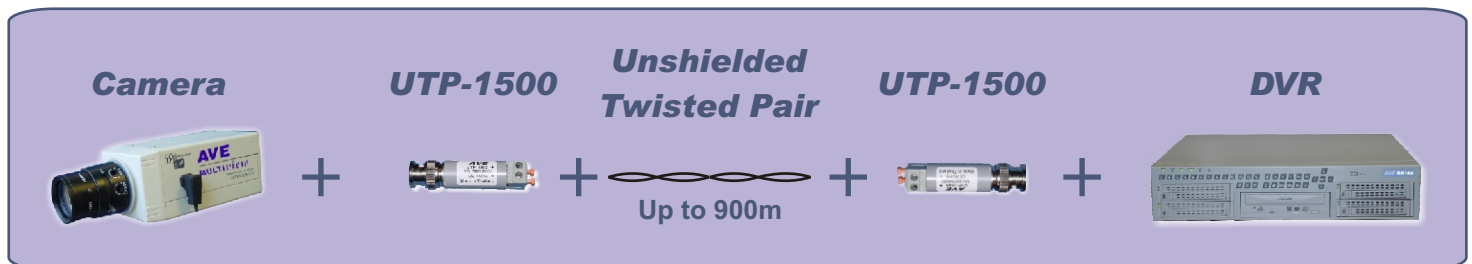

Twisted Pair Technology

Passive Transmitter / Receiver

What does the UTP-1500 do?

The AVE-UTP-1500 Video Adapter allows a signal to travel up to 3,000 feet or 900m in B&W, or 2,000 feet in Colour using Unshielded Twisted Pair Cable UTP (CAT5 for example). The signal can be Video Images or PTZ Control Commands.

The AVE UTP-1500 Passive Transmitter / Receiver allows you to take advantage of existing cabling that may already be installed in a building, or run UTP cable instead of the more expensive and harder to manipulate Coaxial cable.

Reduce expensive Coax Cable runs

AVE [American Video Equipment] are leaders in manufacturing of Security Equipment. To find out more about the AVE-UTP-1500 or any other product in the AVE range please visit our website WWW.AVE-UK.COM or drop us an email at enquiries@ave-uk.com or simply give us a call on 0044 (0)870 770 9323
