Twisted Pair Technology

AVE-UTP-X1500 PASSIVE HUBS

AVE UTP Passive Transmitters and Receivers bring the ease of using structured Unshielded Twisted Pair Cable such as CAT3,4,5,6 for transmission of video signals.

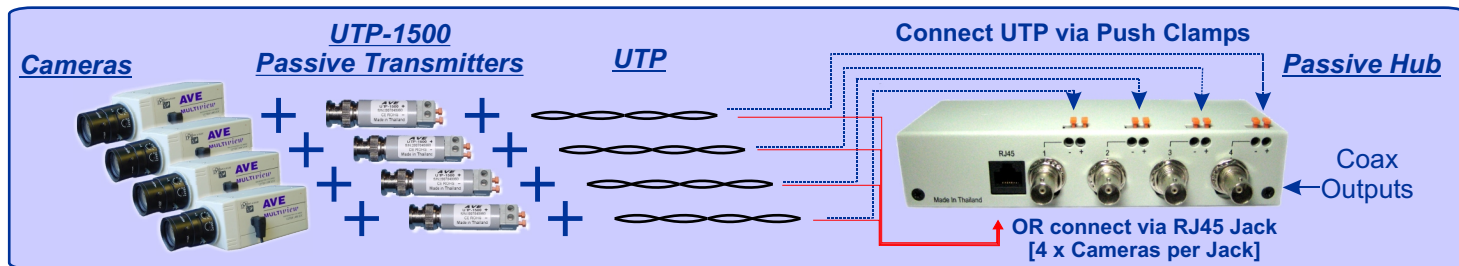

For multiple camera installations the use of the AVE Passive Hubs simplify installation even further.

The AVE hubs are available in 4, 8 and 16 Channel

Push Cage Clamps for individual UTP connections or a common RJ45 for CAT5 which can accommodate 4 video cameras in one cable run can be used.

The fully compatible product line allows the interchangeability of components in the AVE UTP range.

UTP PASSIVE HUBS

MOUNTING OPTIONS

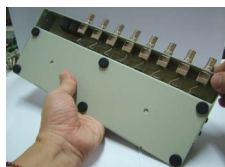

WALL MOUNT. AVE-UTP-X1500 PASSIVE HUBS use a special two piece housing that is specially designed to allow the unit to be wall mounted.

The unit can be unscrewed and easily breaks apart to access holes for secure wall mount.

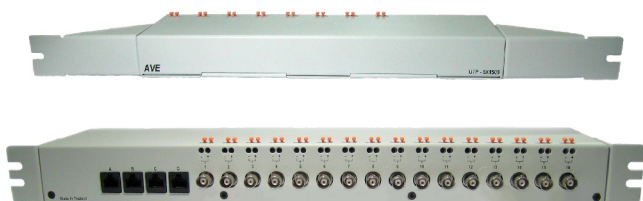

Once fixed to the wall the unique design enables the unit to slide onto the secured back plate and be screwed into position.

The unit can be mounted in any orientation that suits the application.

RACK MOUNT. AVE-UTP-X1500 PASSIVE HUBS Rack Mount adapters allow the units to be mounted in two ways

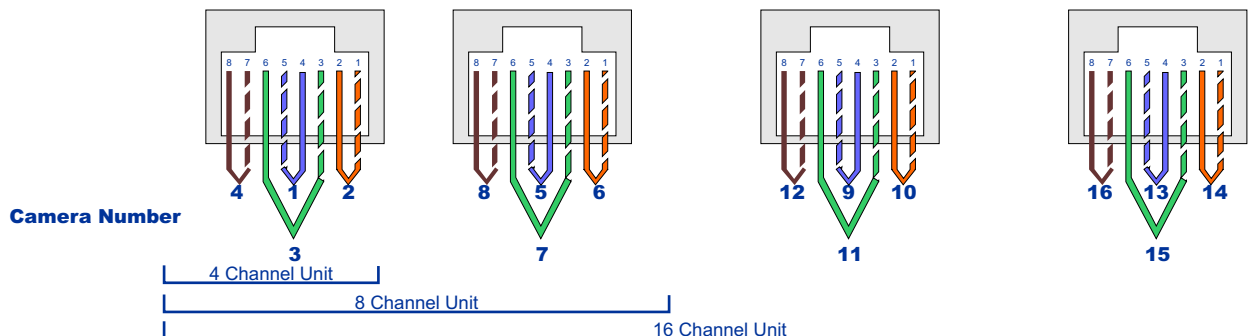

FRONT RACK MOUNT: allows rear facing connections

REAR RACK MOUNT: allows front facing connections

RJ45 Pin Out

RJ45 JACK

The AVE hubs include individual cage clamps for individual UTP video runs or a common RJ45 for CAT5 which can accommodate 4 video cameras in one cable run.
